Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

1. Nature and continuance of operations

Oracle Mining Corp. (the "Company" or "Oracle Mining"), formerly Gold Hawk Resources Inc., is listed on the TSX Venture Exchange under the symbol "OMN", and is a company incorporated under the Canada Business Corporations Act and a reporting issuer under the jurisdiction of British Columbia. The Company is engaged in the acquisition, exploration, development and exploitation of mineral resource projects.

The Company's head office, principle address and registered office is #1550-666 Burrard Street, Vancouver, British Columbia, V6C 3E1.

On September 28, 2010, the Company completed the acquisition of the Oracle Ridge copper property near Tucson, Arizona. The Company has started exploration and development activities on this property and is developing a plan to bring the property into production. In accordance with the Company's accounting policy (Note 2(h)), all exploration and evaluation expenditures are expensed until such time as a technical feasibility study has been completed and commercial viability is demonstrable. The Company's goal is to become a mid-tier copper producer.

These financial statements are prepared on the basis of a going concern which assumes the realization of assets and satisfaction of liabilities in the normal course of business. During the three and nine months ended September 30, 2011, the Company incurred a net loss for the period of \$3,218,000 and \$10,775,000, respectively. The continuation of the Company as a going concern is dependent on its ability to obtain necessary financing as required, to complete exploration and development activities on the Oracle Ridge copper property and ultimately the achievement of profitable operations. These material uncertainties cast doubt upon the Company's ability to continue as a going concern.

2. Summary of significant accounting policies

(a) Basis of preparation

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34") using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the IFRS Interpretations Committee ("IFRIC"). Prior to January 1, 2011, the Company prepared its consolidated annual and consolidated interim financial statements in accordance with Canadian generally accepted accounting principles ("GAAP"). The date of transition to IFRS is January 1, 2010.

The Company's IFRS accounting policies are presented in Note 2 and have been applied in preparing the condensed consolidated interim financial statements for the part of the period covered by the Company's first IFRS consolidated annual financial statements for the year ending December 31, 2011, the comparative information and the opening statement of financial position at the date of transition. The effects of the transition to IFRS on equity, total comprehensive (loss) income and the statement of financial position are presented in Note 16.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

2. Summary of significant accounting policies (continued)

(a) Basis of preparation (continued)

These condensed consolidated interim financial statements have been prepared on a historical cost basis. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The preparation of interim financial statements in conformity with IAS 34 requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

These condensed consolidated interim financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the Company's audited annual consolidated financial statements for the year ended December 31, 2010 prepared in accordance with GAAP.

The policies applied in these condensed consolidated interim financial statements are based on IFRSs issued and outstanding as at November 10, 2011, the date the Board of Directors approved these condensed consolidated interim financial statements for issue.

The standards that will be effective in the annual financial statements for the year ending December 31, 2011 are subject to change and may be affected by additional interpretation(s). Accordingly, the accounting policies for the annual period that are relevant to these condensed consolidated interim financial statements will be determined only when the first IFRS financial statements are prepared for the year ending December 31, 2011.

(b) Basis of consolidation

The condensed consolidated interim financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries). Control is achieved where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The Company's subsidiaries are as follows:

Name	Country of incorporation	Ownership interest
0830438 BC Ltd.	Canada	100%
Oracle Ridge Mining LLC	USA	100%
Copper Moon Mining LLC	USA	100%
Minas San Juan Ltd.	Bahamas	100%

All intra-company transactions, balances, income and expenses are eliminated on consolidation.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

2. Summary of significant accounting policies (continued)

(c) *Foreign currencies*

The condensed consolidated interim financial statements are presented in United States (U.S.) dollars. Prior to January 1, 2011, the Company's presentation currency was the Canadian dollar. The functional currency of Oracle Mining and Minas San Juan Ltd. is the Canadian dollar. The functional currency of Oracle Ridge Mining LLC and 0830438 BC Ltd. is the U.S. dollar. The functional currency determinations were conducted through an analysis of the consideration factors identified in IAS 21, *The Effect of Changes in Foreign Exchange Rates*.

These condensed consolidated interim financial statements have been translated to the US dollar in accordance with IAS 21, *The Effects of Changes in Foreign Exchange Rates*. This standard requires that assets and liabilities be translated using the exchange rate at period end, and income and expenses be translated using the exchange rates at the dates of the transactions (where there is not significant fluctuation in the exchange rates used, the average rate for the period is applied to income and expense balances). The exchange differences are recognized as a component of other comprehensive income in the statement of comprehensive (loss) income.

Transactions in currencies other than the entity's functional currency are recorded at the rates of exchange prevailing on the dates of the transactions. At each financial position reporting date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at the date of the statement of financial position. Non-monetary assets and liabilities carried at fair value that are denominated in foreign currencies are translated at rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

(d) *Financial instruments*

Financial assets and liabilities are recognized when the entity becomes a party to the contractual provisions of the instrument. Upon initial recognition, financial assets and liabilities are measured at fair value plus transaction costs, except for those financial assets and liabilities classified as fair value through profit or loss, which are initially measured at fair value.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

2. Summary of significant accounting policies (continued)

(d) Financial instruments (continued)

(i) Financial assets

The Company classifies its financial assets into one of the following categories, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

- Fair value through profit or loss ("FVTPL") - This category comprises derivatives, assets acquired or incurred principally for the purpose of selling or repurchasing it in the near term, or assets designated upon initial recognition as FVTPL. They are carried in the statement of financial position at fair value with changes in fair value recognized in the statement of (loss) income.
- Loans and receivables - These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are carried at amortized cost using the effective interest rate method less any impairment. Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received that a specific counterparty will default. The carrying amount of trade receivables is reduced through an allowance account. Amounts deemed to be uncollectable are written off against the allowance account and subsequent recoveries are credited against the allowance account. Changes in the allowance account are recognized in the statement of (loss) income.
- Held-to-maturity investments - These assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. These assets are measured at amortized cost using the effective interest method. If there is objective evidence that the investment is impaired, determined by reference to external credit ratings and other relevant indicators, the financial asset is measured at the present value of estimated future cash flows discounted at the entity's original effective interest rate. Any changes to the carrying amount of the investment, including impairment losses, are recognized in the statement of (loss) income.
- Available-for-sale - Non-derivative financial assets not included in the above categories are classified as available-for-sale. They are carried at fair value with changes in fair value recognized directly in equity. Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment, the amount of the loss is removed from equity and recognized in the statement of (loss) income.

All financial assets except for those recorded at fair value through profit or loss are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is any objective evidence that a financial asset or a group of financial assets is impaired. Different criteria to determine impairment are applied for each category of financial assets, which are described above.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

2. Summary of significant accounting policies (continued)

(d) Financial instruments (continued)

(ii) Financial liabilities

The Company classifies its financial liabilities into one of two categories depending on the purpose for which the liability was assumed. The Company's accounting policy for each category is as follows:

- Fair value through profit or loss - This category comprises derivatives, liabilities acquired or incurred principally for the purpose of selling or repurchasing it in the near term or liabilities designated upon initial recognition as FVTPL. They are carried in the statement of financial position at fair value with changes in fair value recognized in the statement of (loss) income
- Other financial liabilities - Other financial liabilities are subsequently measured at amortized cost, using the effective interest rate method.

The Company's financial instruments consist of the following:

<u>Instrument</u>	<u>Classification</u>	<u>Measurement basis</u>
Cash and cash equivalents	Fair value through profit or loss	Fair value
Marketable securities	Fair value through profit or loss	Fair value
Investment in CMSJ	Available-for-sale	Fair value
Other receivables	Loans and receivables	Amortized cost
Trade and other payables	Other liabilities	Amortized cost
Other current liabilities	Other liabilities	Amortized cost
Promissory notes payable	Other liabilities	Amortized cost
Other long-term liabilities	Other liabilities	Amortized cost

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

2. Summary of significant accounting policies (continued)

(d) *Financial instruments (continued)*

(iii) Classification of financial instruments

IFRS 7 establishes a fair value hierarchy that reflects significance of inputs in measuring fair value as follows:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. prices) or indirectly (i.e. derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's cash and cash equivalents are designated as Level 1 and the Company's marketable securities and investment in CMSJ as Level 2.

The fair values of cash and cash equivalents, trade and other payables, and other current liabilities approximate their carrying values due to the short-term maturities of these financial instruments.

(e) *Cash and cash equivalents*

The Company considers cash to be cash on deposit and cash equivalents to be highly liquid short-term interest bearing securities with maturities at the date of purchase of three months or less.

(f) *Plant and equipment*

Plant and equipment are recorded at cost less accumulated depreciation and impairment losses, if any, and are depreciated using the straight-line method over the following periods:

Mobile equipment	5 years
Furniture and fixtures	5 years
Computer equipment and software	4 years
Machinery and equipment	5 years
Leasehold improvements	Term of lease

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

2. Summary of significant accounting policies (continued)

(f) *Plant and equipment (continued)*

Amortization of mobile equipment as well as machinery and equipment used directly in exploration or development projects are included in exploration and development costs. Where an item of plant and equipment comprises significant components with different useful lives, the components are accounted for as separate items of plant and equipment and depreciated over their useful life.

Borrowing costs directly associated with the construction or acquisition of qualifying assets are capitalized at interest rates relating to borrowings specifically raised for that purpose, or at the weighted average borrowing rate where the general pool of group borrowings is utilized. Capitalization of borrowing costs ceases when the asset is substantially complete.

All other borrowing costs are expenses when incurred.

The depreciation method, useful life and residual values are assessed annually.

(g) *Impairment of non-financial assets*

Non-financial assets are reviewed for impairment if there is any indication that the carrying amount may not be recoverable. If any such indication is present, the recoverable amount of the asset is estimated in order to determine whether an impairment exists. Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Any intangible asset with an indefinite useful life is tested for impairment annually and whenever there is an indication that the asset may be impaired.

An asset or cash generating units recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value, using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset or cash generating unit is estimated to be less than its carrying amount, the carrying amount is reduced to the recoverable amount. Impairment is recognized immediately in profit or loss. Where an impairment subsequently reverses, the carrying amount is increased to the revised estimate of recoverable amount but only to the extent that this does not exceed the carrying value that would have been determined if no impairment had previously been recognized.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

2. Summary of significant accounting policies (continued)

(h) *Mineral properties*

All direct costs related to the acquisition of mineral properties are capitalized as intangible assets on a property by property basis. The Company expenses all costs relating to the exploration for and development of mineral claims and crediting all revenues received against the cost of the related claims. Such costs include, but are not limited to, geological, geophysical studies, exploratory drilling and sampling.

Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation expenses attributable to that area of interest will be capitalized in mineral properties. Costs will continue to be capitalized until the property to which they relate is ready for its intended use, sold, abandoned or management has determined there to be impairment. If economically recoverable reserves are developed, capitalized costs of the property are depleted using the units of production method.

(i) *Income taxes*

Income tax comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is recorded using the balance sheet liability method, providing for temporary differences, between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: initial recognition of goodwill; the initial recognition of assets or liabilities in a transaction that affects neither accounting or taxable loss and is not a business combination; and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates substantively enacted at the date of the statement of financial position.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a deferred tax asset will be recovered, the deferred tax asset is reduced using a valuation allowance.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

2. Summary of significant accounting policies (continued)

(j) *Share-based payment transactions*

The share option plan allows the Company's employees and consultants to acquire shares of the Company. The fair value of options granted to employees is recognized as a share-based payment expense with a corresponding increase in equity. The fair value is measured for each tranche at grant date and is recognized on a graded-vesting basis over the period during which the options vest. The fair value of the options granted is measured using the Black-Scholes option pricing model taking into account the terms and conditions upon which the options were granted and management's estimate of forfeitures. At each financial position reporting date, the amount recognized as an expense is adjusted to reflect the actual number of share options that vest.

(k) *Restoration, rehabilitation, and environmental obligations*

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration or development of a mineral interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset, along with a corresponding liability as soon as the obligation to incur such costs arises. The timing of the actual rehabilitation expenditure is dependent on a number of factors such as the life and nature of the asset and the environment in which the mine operates.

Pre-tax discount rates that reflect the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either the unit-of-production or the straight-line method. The corresponding liability is progressively increased as the effect of discounting unwinds creating an expense recognized in profit or loss.

Decommissioning costs are also adjusted for changes in estimates. Those adjustments are accounted for as a change in the corresponding capitalized cost, except where a reduction in costs is greater than the unamortized capitalized cost of the related assets, in which case the capitalized cost is reduced to nil and the remaining adjustment is recognized in profit or loss.

The operations of the Company have been, and may in the future be, affected from time to time in varying degree by changes in environmental regulations, including those for site restoration costs. Both the likelihood of new regulations and their overall effect upon the Company are not predictable.

The Company has no material restoration, rehabilitation and environmental obligations at September 30, 2011 as the disturbance to date on the Company's mineral properties is not significant.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

2. Summary of significant accounting policies (continued)

(l) Provisions

Provisions are recorded when a present legal or constructive obligation exists as a result of past events where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the statement of financial position date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount receivable can be measured reliably.

(m) Leases

Leases in which the Company assumes substantially all risks and rewards of ownership are classified as finance leases. Assets held under finance leases are recognized at the lower of the fair value and the present value of the minimum lease payments at inception of the lease, less accumulated depreciation and impairment losses. Operating lease payments are recognized as an expense on a straight-line basis over the lease term.

(n) (Loss) income per share

The Company presents the basic (loss) income per share data for its common shares, calculated by dividing the (loss) income attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. The diluted (loss) income per share reflects the potential dilution of common share equivalents, such as outstanding stock options and share purchase warrants, in the weighted average number of common shares outstanding for the year, if dilutive. The number of additional shares is calculated by assuming that outstanding stock options and warrants were exercised and that the proceeds from such exercises were used to acquire common shares at the average market price during the reporting period. During the three and nine months ended September 30, 2011 all outstanding stock options and warrants were anti-dilutive.

(o) Significant accounting judgments

The critical judgments that the Company's management has made in the process of applying the Company's accounting policies, apart from those involving estimations (Note 2 (p)), that have the most significant effect on the amounts recognized in the Company's condensed consolidated interim financial statements are related to the economic recoverability of the mineral properties, the determination of functional currency for the Company and its subsidiaries, the determination that the acquisition of the Oracle Ridge project represents an acquisition of an asset rather than a business combination and the assumption that the Company will continue as a going concern.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

2. Summary of significant accounting policies (continued)

(p) *Significant accounting estimates*

The preparation of these condensed consolidated interim financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. The condensed consolidated interim financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and the revision affects both current and future periods.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the statement of financial position date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- the recoverability of amounts receivable and prepayments which are included in the statement of financial position;
- impairment of non-financial assets;
- the estimated fair value of marketable securities;
- the estimated useful lives of property, plant and equipment which are included in the condensed consolidated interim statement of financial position and the related depreciation included in the statement of (loss) income; and
- the inputs used in accounting for share-based compensation expense in the statement of (loss) income.

(q) *New accounting standards and interpretations*

The following are IFRS changes that have been issued by the International Accounting Standards Board, which may affect the Company, but are not yet effective:

IAS 12, Income taxes, was amended in December 2010 to remove subjectivity in determining on which basis an entity measures the deferred tax relating to an asset. The amendment introduces a presumption that an entity will assess whether the carrying value of an asset will be recovered through the sale of the asset. The amendment to IAS 12 is effective for reporting periods beginning on or after January 1, 2012. The Company is assessing the effect of the changes to IAS 12 on its financial results and financial position.

IAS 27, Separate Financial Statements, replaced the existing IAS 27 "Consolidated and Separate Financial Statements". IAS 27 contains accounting and disclosure requirements for investments in subsidiaries, joint ventures and associates when an entity prepares separate financial statements. IAS 27 requires an entity preparing separate financial statements to account for those investments at cost or in accordance with IFRS 9 Financial Instruments. IAS 27 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted. The Company is assessing the effect of the changes to IAS 27 on its financial results and financial position.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

2. Summary of significant accounting policies (continued)

(q) *New accounting standards and interpretations (continued)*

IAS 28, Investments in Associates and Joint Ventures, was amended in 2011 and prescribes the accounting for investments in associates and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures. IAS 28 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted. The Company is assessing the effect of the changes to IAS 28 on its financial results and financial position.

IFRS 7, Financial Instruments: Disclosures, was amended in October 2010 to provide additional disclosure on the transfer of financial assets including the possible effects of any residual risks that the transferring entity retains. These amendments are effective for fiscal years beginning on or after July 1, 2011. The Company is assessing the effect of the changes to IFRS 7 on its financial statement disclosures.

IFRS 9, Financial Instruments, was issued in November 2009 and is the first step to replace current IAS 39, Financial Instruments: Recognition and Measurement. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 was originally effective for annual periods beginning on or after January 1, 2013, however there is a proposal to defer the effective date to January 1, 2015. The Company is assessing the effect of IFRS 9 on its financial results and financial position; however any changes are not expected to be material.

IFRS 10, Consolidated Financial Statements, establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities. IFRS 10 supersedes IAS 27, Consolidated and Separate Financial Statements, and SIC-12, Consolidation—Special Purpose Entities, and is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted. The Company is assessing the effect of the changes to IFRS 10 on its financial results and financial position.

IFRS 11, Joint Arrangements, establishes principles for financial reporting by parties to a joint arrangement. IFRS 11 supersedes current IAS 31, Interests in Joint Ventures, and SIC-13, Jointly Controlled Entities - Non-Monetary Contributions by Venturers, and is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted. The Company is assessing the effect of the changes to IFRS 11 on its financial results and financial position.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

2. Summary of significant accounting policies (continued)

(q) *New accounting standards and interpretations (continued)*

IFRS 12, Disclosure of Interests in Other Entities, applies to entities that have an interest in a subsidiary, a joint arrangement, an associate or an unconsolidated structured entity. IFRS 12 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted. The Company is assessing the effect of the changes to IFRS 12 on its financial statement disclosures.

IFRS 13, Fair Value Measurements, defines fair value, sets out in a single IFRS framework for measuring fair value and requires disclosures about fair value measurements. The IFRS 13 applies to IFRSs that require or permit fair value measurements or disclosures about fair value measurements (and measurements, such as fair value less costs to sell, based on fair value or disclosures about those measurements), except in specified circumstances. IFRS 13 is to be applied for annual periods beginning on or after January 1, 2013. Earlier application is permitted. The Company is assessing the effect of the changes to IFRS 13 on its financial results and financial position.

3. Mineral properties

	September 30, 2011	December 31, 2010
	\$	\$
Oracle Ridge copper project ⁽ⁱ⁾	20,815	20,747
Copper Moon property ⁽ⁱⁱ⁾	25	-
Total	20,840	20,747

(i) *Oracle Ridge copper project*

On September 28, 2010, the Company completed the acquisition of the Oracle Ridge copper property through the purchase of all the outstanding common shares of 0830438 BC Ltd. and its wholly-owned subsidiary, Oracle Ridge Mining LLC. The transaction has been accounted for as an asset acquisition by the Company.

The aggregate purchase consideration consisted of 11,200,000 common shares of the Company, which have been valued at \$1.29 (C\$1.33) per share, the share price of the Company on the closing date of the transaction.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

3. Mineral properties (continued)

(i) Oracle Ridge copper project (continued)

The purchase consideration has been allocated to the assets acquired and liabilities assumed as follows:

	\$
Shares issued upon acquisition	14,454
Transaction Costs	322
Purchase consideration	<u>14,776</u>
Cash and cash equivalents	14
Prepays	8
Mineral properties	20,747
Trade and other payables	(890)
Other current liabilities	(541)
Promissory notes payable	(4,090)
Other long term liability	<u>(472)</u>
	<u>14,776</u>

The Oracle Ridge property is located 24 km northeast of Tucson, Arizona. The Company has secured the surface rights by way of lease and by purchase of an adjacent property necessary to bring the property into production.

On August 1, 2011, the Company entered into a lease agreement for additional land adjacent to the Oracle Ridge property. The lease is for a term of 15 years and requires annual payments of \$19,200, with two additional five year renewal terms. The Company paid an initial non-refundable payment of \$57,600 upon execution of the lease.

(ii) Copper Moon property

On June 29, 2011, the Company entered into an option agreement to acquire a 100% interest in a mineral property in Colorado. Under the terms of the agreement, the Company made a cash payment of \$25,000 on signing of the agreement and is required to make the following payments to keep the option in good standing: a cash payment of \$20,000 on or before June 29, 2012, a cash payment of \$20,000 on or before June 29, 2013, and a cash payment of \$500,000 on or before June 29, 2013.

Oracle Mining Corp.

5. Other current liabilities

As part of the acquisition of Oracle Ridge (Note 3), the Company assumed current liabilities of \$542,000 for the purchase of land adjacent to the Oracle Ridge property. The terms of the liability had an interest rate of 7% per annum, payable in two installments, January 30, 2011 and July 30, 2011. In January 2011, the Company settled the total liability outstanding on the property for \$558,000 (inclusive of interest).

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

6. Promissory notes payable

As part of the acquisition of Oracle Ridge (Note 3), the Company assumed promissory notes payable of \$3,800,000 that was secured by the Oracle Ridge copper property.

As at September 30, 2011, the amount outstanding is as follows:

	September 30 2011	December 31 2010
	\$	\$
Promissory notes payable, including accrued interest	3,314	3,154
Less: Current portion	(1,000)	(1,000)
Notes payable, non-current	<u>2,314</u>	<u>2,154</u>

The schedule of principal payment amounts and maturity dates of the notes as at September 30, 2011 are as follows:

Principal	Maturity date
\$500,000	October 31, 2011 ¹
\$500,000	April 27, 2012 ¹
\$806,500	October 21, 2012 ¹
\$1,000,000	October 21, 2013 ²

¹ The notes bear interest until repaid at 8% per annum and interest is not payable until October 21, 2012.

² The note bears interest at 8% per annum and the interest is payable when the note comes due on October 21, 2013.

As part of the acquisition of Oracle Ridge (Note 3), the Company assumed an obligation to construct a roadway on the property and committed to spend a minimum of \$500,000 in the realization of this project. If the Company is unable to complete construction of the road by June 2011, the Company is still liable for the \$500,000 and this amount will be added to the principal of the Company's 2013 promissory note payable and will become due in October 2013. As the Company did not construct the road by June 2011, the principle of \$500,000 has been added to Company's 2013 promissory note payable above.

Subsequent to quarter-end, the Company paid \$500,000 owing under the promissory notes payable.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

7. Capital risk management

The Company's objectives in managing its liquidity and capital resources are to safeguard the Company's ability to continue as a going concern and to provide financial capacity to meet its strategic objectives. The capital structure of the Company consists of promissory notes payable, other long-term liabilities, and equity, comprised of issued capital, warrant reserve, share based payment reserve, foreign currency translation reserve and deficit.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue shares, issue new debt, and acquire or dispose of assets.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The annual and updated budgets are approved by the Board of Directors. The Company does not pay out dividends.

The Company expects its current capital resources will be sufficient to carry out its exploration and development plans through its current operating period.

The Company's capital at September 30, 2011 is as follows:

	\$
Promissory notes payable	3,314
Other long-term liabilities	289
Equity	30,977
	<hr/> 34,580

8. Financial risk and risk management

The Company's financial instruments consist of cash and cash equivalents, other receivables, marketable securities, investment in the Company's former Peruvian subsidiary Compania Minera San Juan ("CMSJ"), trade and other payables, promissory notes payable and other liabilities. The Company has exposures to risks of varying degrees of significance which could affect its ability to achieve its strategic objectives for growth and shareholder returns. The principal financial risks to which the Company is exposed are interest rate risk, foreign currency risk, credit risk and liquidity risk. The Board of Directors is responsible for the establishment and oversight of the Company's risk management policies and reviews the policies on an ongoing basis.

(a) Interest rate risk

The Company has interest bearing promissory notes payable with fixed interest rates, principal and interest are payable upon maturity of the notes.

The Company is also exposed to interest rate risk with respect to the interest it earns on its cash and cash equivalents balances.

The Company does not enter into derivative contracts to manage the risk associated with interest rate movements.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

8 Financial risk and risk management (continued)

(b) Foreign currency risk

The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates. The Company operates in Canada and has acquired a 100% interest in the Oracle Ridge copper property in the U.S. A significant change in the currency exchange rates between the Canadian dollars relative to the U.S. dollar could have an effect on the Company's financial performance, financial position or cash flows. The Company has not hedged its exposure to currency fluctuations.

At September 30, 2011, the Company holds the following financial instruments denominated in Canadian dollars or U.S. dollars:

	US\$	C\$
Cash and cash equivalents	3,036	10,504
Other receivable	651	204
Trade and other payables	(940)	(307)
Promissory notes payable	(3,314)	-
Other long-term liabilities	(289)	-
	<u>(856)</u>	<u>10,401</u>

At September 30, 2011, with other variables unchanged, a 10% change in the U.S. dollar/Canadian dollar exchange rate would impact pre-tax loss by \$0.1 million and \$0.4 million for the three months ended and nine months ended September 30, 2011, respectively.

(c) Credit risk

The Company's credit risk is mainly attributable to its liquid financial assets: cash and cash equivalents, marketable securities, investment in CMSJ and other receivables. The Company deposits cash with high credit quality financial institutions and credit risk is considered to be minimal. The Companies maximum exposure to credit risk is \$13,994,000.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

8. Financial risk and risk management (continued)

(d) Liquidity risk

The Company manages liquidity risk through an annual budget and ongoing monitoring of expenses and capital expenditures to ensure it has sufficient liquidity to meet its business requirements as they come due. As of September 30, 2011, the Company had working capital of \$11,876,000 (December 31, 2010 - \$22,624,000).

As at September 30, 2011, the Company's liabilities and commitments have contractual maturities of:

	Payments due by period			
	Total	Less than 1 year	1-5 years	More than 5 years
	\$	\$	\$	\$
Trade and other payables	1,235	1,235	-	-
Promissory notes payable, including interest	3,314	1,000	2,314	-
Other liabilities	289	-	289	-
Lease commitments	603	268	220	115
	5,441	2,503	2,823	115

Although the Company does not have operating profits, the Company believes it has sufficient cash on hand to meet operating requirements for at least the next twelve months. However, the Company will require significant funding in the future to complete development of Oracle Ridge.

9. Issued capital

(a) Authorized

The Company's authorized share capital consists of an unlimited number of common shares with no par value.

(b) Issued

During the nine months ended September 30, 2011, the Company issued 171,900 shares upon the exercise of stock options and warrants for gross proceeds of C\$243,000.

On September 28, 2010, the Company issued 11,200,000 shares in consideration for the acquisition of the Oracle Ridge copper property through the share purchase of 0830438 BC LTD ("Oracle Ridge") which have been valued at \$1.29 (C\$1.33) per share, the share price of the Company on the closing date of the transaction (Note 3).

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

9. Issued capital (continued)

(b) Issued (continued)

On October 20, 2010, the Company announced that warrant holders of 878,200 common share purchase warrants with an exercise price of C\$1.25 were subject to a 30-day forced exercise provision as the Company's closing share price met or exceeded C\$1.50 for the 10 consecutive trading days. A total of 850,200 warrants were exercised as of the November 19, 2010 deadline, accordingly, the Company issued 850,200 shares at C\$1.25 per share for total proceeds of C\$1,063,000 (US\$1,049,000).

On November 8, 2010, the Company closed a non-brokered private placement for 6,000,000 common shares at a subscription price of C\$1.25 per common share for aggregate gross proceeds of C\$7,500,000 (\$7,400,000). The Company paid a finder's fee to an arm's length party in the aggregate amount of C\$450,000 (\$444,000) and incurred C\$83,000 (\$82,000) in other issuance costs. The private placement was fully subscribed to by Melior Resources Inc. ('Melior'), formerly Coalcorp Mining Inc. As at September 30, 2011, Melior owned approximately 14.3% of the Company's issued and outstanding shares.

(c) Stock option plan

Pursuant to the terms of the Company's stock option plan the board of directors may, from time to time, grant options to directors, officers, employees or consultants. Options may be exercisable over periods of up to five years as determined by the Board of Directors of the Company and the exercise price is the last closing price of the shares preceding the awarding date. Stock options granted to employees, officers and consultants vest one-third immediately, one-third after 12 months from the date of grant and one-third after 24 months from the date of grant, while stock options granted to directors vest immediately. Stock options granted to investor relation consultants vest quarterly from the date, with 25% of the options vesting each quarter and are exercisable for a period of two years.

A summary of the Company's stock options outstanding as at September 30, 2011 and the changes for the nine months then ended are as follows:

	Directors and officers	Employees and consultants	Total number of options	Weighted average exercise price per share
				C\$
Balance, January 1, 2010	462,200	54,200	516,400	5.47

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

9. Issued capital (continued)

(d) Stock-based compensation

During the nine months ended September 30, 2011, the Company granted 1,075,000 (2010 - 695,000) stock options to directors, officers and employees. An amount of \$1,131,000 (2010 - \$614,000) was recorded in share-based payment reserve in recognition of stock-based compensation, based on the vesting schedule for the options granted.

The fair value of each option granted during the quarter is estimated on the date of grant using the Black-Scholes option pricing model with weighted average assumptions and resulting values for grants as follows:

	Nine months ended September 30	
	2011	2010
Number of options granted	1,075,000	695,000
Weighted average		
Risk-free interest rate (%)	1.85	1.64
Expected life (years)	2.80	3.00
Expected volatility (%)	90	142
Expected dividend (%)	-	-
Forfeiture rate (%)	9.42	16.10
Weighted average fair value (per option)	0.96	0.81

Stock option pricing models require the input of subjective assumptions including the expected price volatility. Changes in the assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable measure of fair value of the Company's options.

Subsequent to quarter-end, the Company granted 150,000 options to a director of the Company at an exercise price of \$0.99. In addition, the Company granted 450,000 options to investor relations consultants at an average exercise price of \$1.31.

(e) Share purchase warrants

A summary of the Company's share purchase warrants outstanding as at September 30, 2011 and the changes for the nine months then ended are as follows:

	Number of warrants	Average price of warrants
		C\$
Balance, January 1, 2010	3,802,000	1.39
Expired	(2,028,000)	1.25
Exercised	(850,200)	1.25
Balance, December 31, 2010	923,800	2.40

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

9. Issued capital (continued)

(e) Share purchase warrants (continued)

	Number of warrants	Average price of warrants C\$
Balance, December 31, 2010	923,800	2.40
Expired	(861,900)	2.45
Exercised	(61,900)	1.75
Balance, September 30, 2011	-	-

On May 19, 2010 the Company announced an amendment to the 1,002,000 share purchase warrants issued further to the private placement that closed on June 3, 2009. The amendment, extended the exercise term from June 3, 2010 to June 3, 2011, and changed the exercise price from C\$1.75 to C\$1.25. The estimated incremental fair value of these amended warrants was determined using the Black-Scholes model with the following assumptions: a risk free interest of 1.76%, an expected volatility of 85.48%, an expected dividend yield of \$Nil and an expected life of 0.5 years. This incremental fair value in the amount of \$145,000 was recorded as a capital charge in the statement of changes in equity. Warrant pricing models require the input of subjective assumptions including the expected price volatility. Changes in the assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's warrants.

On October 20, 2010, the Company announced that warrant holders of 878,200 common share purchase warrants with an exercise price of C\$1.25 were subject to a 30-day forced exercise provision as the Company's closing share price met or exceeded C\$1.50 for the 10 consecutive trading days. A total of 850,200 warrants were exercised as of the November 19, 2010 deadline, accordingly, the Company issued 850,200 shares at C\$1.25 per share for total proceeds of C\$1,063,000 (US\$1,049,000).

On May 8, 2011, 800,000 common share purchase warrants with an exercise price of C\$2.50 expired unexercised.

On June 3, 2011, 61,900 share purchase warrants were exercised for proceeds of C\$108,000 and 61,900 share purchase warrants expired unexercised.

12. Related party transactions

- (a) During the three and nine months ended September 30, 2011, the Company paid \$126,000 (2010 - \$37,000) and \$426,000 (2010 - \$109,000) in advisory fees, respectively, to directors of the Company.

These transactions were incurred in the normal course of business and are measured at the fair value of the services provided.

- (b) *Compensation of key management personnel*

The remuneration of directors and other members of key management personnel during the three and nine month period ending September 30, 2011 were as follows:

	Three months ended September 30	
	2011	2010
	\$	\$
Salaries and directors' fees ¹	281	261
Share-based payment ²	68	126
Total	349	387

	Nine months ended September 30	
	2011	2010
	\$	\$
Salaries and directors' fees ¹	1,091	770
Share-based payment ²	635	646
Total	1,726	1,416

¹ Salaries and directors' fees include consulting and management fees disclosed in Note 12(a).

² Share-based payments are the fair value of options that have been granted to directors and key management personnel.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

13. Contingencies and commitments

- (a) The Company is committed under the terms of two operating leases for office premises for total aggregate payments of \$373,000 expiring in 2013.
- (c) As part of the share purchase agreement for Oracle Ridge (Note 3), there is a clause whereby if the seller of Oracle Ridge is required to pay U.S. federal capital gains tax at a rate higher than 15%, the Company is required to pay additional consideration for the property in an amount to offset the cost of the additional tax up to the equivalent of a U.S. federal capital gains tax rate of 25%, or \$471,000. U.S. federal capital gains tax rates have been frozen at 15% through to December 31, 2012, therefore no additional taxes will be owed by the seller on the 2012 promissory notes payable (Note 6). It is uncertain as to whether federal capital gains taxes will be raised in 2013 and therefore any additional consideration in relation to the 2013 notes is not determinable at this time.
- (d) In the normal course of business, the Company is aware of certain potential claims. The outcome of these matters is not determinable at this time, although the Company does not believe these potential claims will have a material adverse effect on the Company's operations.

14. Supplemental cash flow information

Non-cash working capital items:

	Three months ended September 30	
	2011	2010
	\$	\$
Prepaid expenses and other receivables	(339)	(774)
Trade and other payables	267	3
Net change in non-cash working capital	(72)	(771)

	Nine months ended September 30	
	2011	2010
	\$	\$
Prepaid expenses and other receivables	(759)	(794)
Trade and other payables	(452)	296
Net change in non-cash working capital	(1,211)	(498)

15. Segmented information

The Company currently operates in one business segment, being the acquisition and development of mineral properties. The Company's sole development property, Oracle Ridge, is located in the U.S. and the Company's head office is located in Canada.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

16. Transition to International Financial Reporting Standards

In preparing the opening IFRS statement of financial position, comparative information for the three and nine months ended September 30, 2010 and the financial statements for the year ended December 31, 2010, the Company has adjusted amounts reported previously in financial statements prepared in accordance with GAAP.

An explanation of how the transition from GAAP to IFRS has affected the Company's financial position, financial performance and cash flows is set out in the following tables.

Exemptions applied

IFRS 1, *First-Time Adoption of International Financial Reporting Standards*, sets forth guidance for the initial adoption of IFRS. Under IFRS 1, the IFRS standards are applied retrospectively as at the transition date with all adjustments to assets and liabilities taken to retained earnings unless certain exemptions are applied. The Company has applied the following exemptions to its opening statement of financial position dated January 1, 2010:

(a) *Business combinations*

IFRS 1 states that a first-time adopter may elect not to apply IFRS 3, *Business Combinations* retrospectively to business combinations that occurred before the date of transition to IFRS. The Company has utilized this election and has applied IFRS 3 to business combinations that occurred on or after January 1, 2010.

(b) *Share-based payment transactions*

IFRS 1 encourages, but does not require, first-time adopters to apply IFRS 2, *Share-based Payment* to equity instruments that were granted on or before November 7, 2002, or equity instruments that were granted subsequent to November 7, 2002 and vested before the later of the date of transition to IFRS and January 1, 2005. The Company has elected not to apply IFRS 2 to awards that vested prior to January 1, 2010.

(c) *Cumulative translation differences*

As permitted by the IFRS 1 election for cumulative translation differences, the Company has deemed cumulative translation differences for foreign operations to be zero at the date of transition. Cumulative translation loss at January 1, 2010 was re-allocated from accumulated other comprehensive loss to deficit. As a result, a difference of \$3,642,000 was recorded in deficit to reduce the foreign currency translation reserve to zero.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

16. Transition to International Financial Reporting Standards (continued)

IFRS 1 also outlines specific guidelines that a first-time adopter must adhere to under certain circumstances. The Company has applied the following mandatory exceptions to its opening statement of financial position dated January 1, 2010:

(d) *Estimates*

In accordance with IFRS 1, an entity's estimates under IFRS at the date of transition to IFRS must be consistent with estimates made for the same date under previous GAAP, unless there is objective evidence that those estimates were in error. The Company's IFRS estimates as of January 1, 2010 are consistent with its GAAP estimates for the same date.

(e) *Non-controlling interest*

Certain requirements of IAS 27 – Consolidated and Separate Financial Statements must be applied prospectively from January, 1, 2010, the Company's transition date. Retrospective application is not permitted. These requirements relate to:

- The attribution of total comprehensive income to non-controlling interests even if this results in non-controlling interests having a deficit balance;
- The accounting for changes in the parent's ownership interest in a subsidiary that do not result in a loss of control as equity transactions; and
- The accounting for loss of control over a subsidiary and the related requirements of IFRS 5 – Non-current Assets Held for Sale and Discontinued Operations.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

16. Transition to International Financial Reporting Standards (continued)

IFRS employs a conceptual framework that is similar to GAAP. However, significant differences exist in certain matters of recognition, measurement and disclosure. While adoption of IFRS has not changed the Company's actual cash flows it has resulted in changes to the Company's reported financial position and financial performance. In order to allow the users of the financial statements to better understand these changes, the Company's Canadian GAAP statement of (loss) income, comprehensive (loss) income, and statement of cash flows for the year ended December 31, 2010, three and nine months ended September 30, 2010, and the statement of financial position on January 1, 2010 and September 30, 2010 have been reconciled to IFRS, with the resulting differences explained below:

(f) *Share-based payment*

GAAP

The fair value of stock-based awards with graded vesting are calculated as one grant and the resulting fair value is recognized on a straight-line basis over the vesting period.

The Company had previously elected under GAAP to recognize forfeitures of awards as they occur.

IFRS

Each tranche of an award with different vesting dates is considered a separate grant for the calculation of fair value, and the resulting fair value is amortized over the vesting period of the respective tranches.

Forfeitures are estimated on the date the award is granted and are revised for actual forfeitures in subsequent periods.

As a result, as at January 1, 2010 an amount of \$94,000 was recorded in deficit to adjust the share-based payment reserve for these differences.

(g) *Available-for-sale investment*

On November 12, 2009, the Company ceased to control its former Peruvian subsidiary, Compania Minera San Juan ("CMSJ") as a result of the dilution of its controlling interest by a third party. The Company's remaining interest in CMSJ at December 31, 2009 was 15%.

GAAP

Available-for-sale ("AFS") investments are recorded at cost unless the available-for-sale equity instrument was quoted in an active market. The investment in CMSJ was recorded at its cost of \$Nil at January 1, 2010.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

16. Transition to International Financial Reporting Standards (continued)

(g) Available-for-sale investment (continued)

IFRS

IFRS requires such investments (AFS equity instruments with no active market) to be measured at fair value unless fair value is not reliably measurable. The Company has concluded that fair value can be determined at January 1, 2010 for the investment in CMSJ from the sale of the 85% interest in this investment in November 2009 to a third party.

As a result, \$2,647,000 was recorded in deficit to adjust the carrying value of Company's investment in CMSJ at the date of transition. In addition, the Company has determined that at June 30, 2010 the fair value of the investment in CMSJ was determinable based on the negotiated price for sale of the investment. The increase in fair value in the three months ended June 30, 2010 has been recorded as a credit to the investment reserve in equity.

This sale closed on July 7, 2010 and the gain on the sale of the Company's investment in CMSJ was also adjusted to reflect the IFRS carrying value.

(h) Acquisition of Oracle Ridge (Note 3)

GAAP

If an acquired project does not constitute a business, the transaction is accounted for as the acquisition of an asset and results in a deferred tax asset or liability being recognized for any difference between the resulting carrying value and the tax basis of the asset.

IFRS

If an acquired project does not constitute a business, the transaction is accounted for as an acquisition of an asset, however, no deferred tax asset or liability is recognized because of the initial recognition exception in IAS 12, which prohibits recording of deferred tax assets or liabilities on asset acquisitions.

As a result, as at December 31, 2010 an amount of \$9,957,000 was recorded to reduce the carrying value of mineral properties, and also remove the deferred tax liability to reflect this difference.

Oracle Mining Corp.

(Formerly Gold Hawk Resources Inc.)

Notes to the condensed consolidated interim financial statements

September 30, 2011

(In US\$, tabular amounts in thousands, unless otherwise noted, unaudited)

16. Transition to International Financial Reporting Standards (continued)

(i) *Exploration and evaluation expenditures*

GAAP

The Company's accounting policy was to capitalize all costs relating to the acquisition of, exploration for and development of mineral claims.

IFRS

The Company has elected to adopt an accounting policy to expense all costs relating to exploration and development of mineral claims until such time as technical feasibility for the related mineral property can be established.

(j) *Statement of cash flows*

The adoption of IFRS had no material impact on the net cash flows of the Company.

(k) *Reclassification of the equity section*

GAAP

The fair values of warrants are reclassified to contribute surplus when the warrants expire.

IFRS

Amounts recorded in warrant reserve are not reclassified on expiry.
